notes

The product is completely biodegradable.
Special runs available upon request.

The Company reserves the right to modify the technological features of the product in relation to market requirements.

Constellation Snow Label is an uncoated, embossed paper which has been specially developed for the labels sector. The particular wet-strength treatment makes this paper ideal for a wide variety of applications in bottling when returnable/recyclable bottles are used.

applications

For labelling, always observe the correct indications as regards grain direction. It must be parallel to the base of the bottle (see drawings).

Form of the label

wrap-around label

Rolling after wetting the back of the label.

correct grain direction

wrong grain direction

Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography, screen printing and bronzing. The macro-porous surface requires the use of oxidative drying inks.

printing suggestions

The varnish coated with an offset machine is almost fully absorbed and therefore does not improve gloss or protection. Good results with major processing operations such as: cutting, die-cutting and glueing.
